Additionally, Adobe Design CC has been streamlined to make it easier to work with multiple Adobe channels and assets within a document. With the new jump to file features, users can now jump instantly from photostreams, assets, links, artboards and branding assets to the file workspace. Users now have the ability to choose the application and design language based on a template. Traditionally, users had to install an entire instance of Photoshop or Adobe Design CC; however, with the new ability to select a template, users can easily access Photoshop in just a workspace within Design CC.
